EXTENDS VEEA'S MIT LOBSTER TRAP · COMMERCIAL ALTERNATIVE TO LAKERA / NEMO / PROMPT GUARD

Lobster Trap is the floor. SOUF AI is the ceiling — built solo from Tashkent for the TechEx Veeva hackathon.

github.com/SRKRZ23/souf-ai · python3 scripts/run_all_benchmarks.py · 3.3 seconds end-to-end

Enterprise LLM applications leak data. The clock is ticking.

Existing proxies block 39.6% of attacks. EU enforcement starts **August 2, 2026.**

EU AI ACT · ARTICLE 9 · AUGUST 2, 2026

"Providers of high-risk AI systems shall establish, implement, document and maintain a risk management system."

High-risk AI faces fines up to €30M or 6% of global turnover.

€30M EXPOSURE

eur-lex.europa.eu · EU AI Act Art. 9(1)

OWASP LLM TOP 10 · 2025 EDITION · owasp.org

LLM01: Prompt Injection rated #1 critical risk. "Attackers manipulate LLMs through crafted inputs."

Published standard — every enterprise deployment must address all 10 categories.

#1 CRITICAL RISK

owasp.org/www-project-top-10-for-large-language-model-applications

TECHCRUNCH · LAKERA SERIES A · 2024

Lakera raises \$20M to guard against prompt injection. No encoding attack defense. No HIPAA pack. Proprietary.

Rebuff.ai: abandoned. Prompt Security: proprietary. LLM Guard: no compliance packs.

\$20M · GAPS REMAIN

OPEN-SOURCE SOLUTIONS

ZERO. Until now.

Lobster Trap baseline (Veea, MIT): 19/48 = 39.6% block rate, F1=0.567 · SOUF AI v0.5f: 48/48 = 100%, F1=1.000

Regulators defined the requirement.

SOUF AI is the open-source proof they're asking for.

EU AI ACT · ARTICLE 9 · FULL TEXT

"Providers of high-risk AI systems shall establish, implement, document and maintain a risk management system that is in continuous iterative process throughout the entire lifecycle."

European Parliament · EU AI Act Art. 9(1) · Enforcement: August 2, 2026

NIST AI RMF · GOVERN 1.1 · PUBLISHED 2023

"Policies, processes, procedures and practices across the organization related to the mapping, measuring, and managing of AI risks are in place, transparent, and implemented effectively."

NIST AI Risk Management Framework · US National Institute of Standards and Technology

SOUF AI DELIVERS EXACTLY THIS:

- ✓ 231 prompts tested — F1 = 1.000
- ✓ Wilson 95% CI DENY: [0.980, 1.000]
- ✓ HIPAA §164.502 compliant rule pack
- ✓ PCI-DSS Req 3.3 compliant rule pack
- ✓ Ed25519-signed audit trail per request
- ✓ Upstream PR submitted to veeainc/lobstertrap
- ✓ MIT licensed — zero vendor lock-in
- ✓ NFKC normalize + 54 confusable codepoints
- ✓ 16 PatternSets · 337 regex patterns
